Inspired by the vivid patterns of Fordite, an agate-like enamel which is a byproduct of the automotive industry, this table was coated with eight different layers of paint, then sanded at various intensities, allowing for its various layers to be revealed.

Devoid of screws, metal fasteners or power tools, its handcrafted individual segments make use of exquisite traditional joinery in recycled old Burma teak wood, thereby addressing issues of sustainability pertaining to both resources and craftsmen. Each piece is individually signed with an inlay of hand-cut brass. A complete knockdown construction allows for it to be disassembled with ease, thus facilitating easy transportation and re-assembly.
